

## Travertino

The Travertino collection is inspired by the limestone rock of the same name, famous in architecture since the days of ancient Rome. An ancient texture that, reinterpreted in a contemporary key, dresses living spaces and projects with its elegant veining. The Italian tradition lives again in the refinement of the irregularity, declined in three different nuances, from white to beige, harmoniously enlivened by tonal transitions and harmonious shades. It is available in 9 mm thickness in three different surfaces, Mat, Soft and Outdoor.
