# H O P

HOP, lavabo in ceramica dallo stile giovane, allegro la cui peculiarità è il "salto" di quota tra il piano rubinetteria e il piano d'appoggio, che crea un' asola contenitore, una base protetta dal bordo alto del lavabo volutamente non troppo sottile, per poter ricavare e ampliare lo spazio interno, ideale per gli oggetti da toeletta.

3 le dimensioni 60x50xh18cm 80x50xh18cm 100x50xh18cm, dove a cambiare è solo la lunghezza della vasca interna, mentre il piano d'appoggio mantiene le stesse dimensioni. I lavabi della collezione HOP sospesi o da appoggio, a firma Simas Design Team, sono corredati da una struttura porta lavabo, modulare, in cui la combinazione delle aste orizzontali consente di raggiungere tutte e 3 le misure dei lavabi, e funge anche da portasciugamani.

La struttura è realizzata in metallo, verniciato a polvere opaco in nero o bianco, con un comodo e ampio ripiano in ceramica alla base. Il profilo degli elementi della struttura è ripreso anche nella cornice di uno specchio retroilluminato con mensola integrata che, con un linguaggio stilistico comune, completa la proposta della collezione HOP.

HOP, ceramic washbasins with a young, cheerful style whose peculiarity is the difference in height between the taphole area and the lower lateral slot, thus creating a sort of 'container' for toiletries, protected by the high edge of the washbasin, which is deliberately not too thin. Three dimensions are available: 60x50xh18cm 80x50xh18cm 100 x50xh18cm, where only the length of the inner bowl changes, while the side countertop maintains the same dimensions. The HOP washbasins, by the Simas design Team, wall-hung or countertop, are equipped with modular free-standing frames that also serve as towel holder and that remain the same for all the three dimensions, the only difference being the horizontal support rod of different length for the three different dimensions.

The metal structure is powder coated in matt black or white and is completed by a comfortable, wide ceramic shelf at the base. The shape of the frame elements is also taken up in the frame of a backlit mirror with integrated shelf that, with a common stylistic language, completes the proposal of the HOP collection.

# R A T I O

RATIO è un lavabo in ceramica, firmato Simas Design Team, in cui le varie funzioni si armonizzano perfettamente nelle linee morbide e nei volumi generosi. Qui le linee minimali si assottigliano nel bordo e definiscono un perimetro all'interno del quale si crea un piano di appoggio laterale.

3 le dimensioni, 55x46 h18cm-65x46xh18cm-75x46x h18cm. Design pulito pure per la struttura in metallo abbinata, nelle finiture nero e bianco opaco, che nasce dall'intersezioni di scatolati verticali e orizzontali per divenire un portasciugamani e un sostegno per un vano contenitore a giorno in legno, disponibile nelle finiture Rovere Naturale, Rovere Fumo e Noce Canaletto.

La struttura, adatta a tutte e 3 le dimensioni dei lavabi, prosegue nascosta sotto il vano contenitore e permette a quest'ultimo libertà di installazione, in modo da creare tra il lavabo e la struttura stessa un'armonia perfetta.

RATIO is a ceramic washbasin by the Simas Design Team, in which the various functions perfectly harmonize with soft lines and generous volumes. A minimalist design where the thin edge defines a perimeter also including a lateral counter.

3 sizes, 55x46 h18cm-65x46xh18cm-75x46x h18cm. Clean design also for the matching metal structure in matt black and white finishes, created by the intersections of vertical and horizontal square tubes shaping into a towel rack and a support for a wooden open storage compartment, available in Rovere Naturale, Rovere Fumo and Noce Canaletto.

The structure, suitable for all 3 sizes of washbasins is partially hidden by the storage compartment and allows the latter to be installed in different positions thus creating a perfect harmony between the basin and the structure itself.

I lavabi della collezione RATIO offrono varie possibilità di installazione: su piano, sospesa e dotata di una struttura con porta salvietta integrato e cassetto a giorno. Sono proposti di default con un foro per rubinetto, ma su richiesta si possono avere senza, in caso di utilizzo di rubinetteria a muro.

The basins by the RATIO collection offer different possibilities of installations: countertop, wall hung and on structure, which is integrated by towel rail and an open element drawer. They are proposed by default with one tap hole, but on demand can be offered without hole, in case of tap on the wall installation.
